

Sprint 2 Review

What has been done:

- Database has been created, CRUD have been implemented as well as unit tests for their functionality
- Early integration of the database to the application
- JavaFX setup for the project
- UI layouts for main view, login, register and management
- User- and book service layers

What is in progress:

- The total number of completed user stories is 10 with 8 left in progress
- Finishing the shopping cart UI
- During sprint 2 six user stories were required to be postponed for sprint 3
- Unit tests for book service layer

Obstacles we faced:

- During Sprint 2 the team did not encounter any obstacles.
