

Sprint 5 Review

What has been done:

- Drop down menu for language selection
- Lasting language selection across pages
- Resource bundles for English, Japanese and Arabic languages
- Localization of all pages of the application including most error messages
- User interface layout orientation based on localisation settings.

What is in progress:

- Finishing reading direction, so that it changes immediately after choosing the language without needing to go to another page and return

Obstacles we faced:

- The team faced no obstacles during the sprint.
