

## Sprint 7 Review

### What has been done:

- SonarQube and JMeter has been implemented into the CD pipeline through Jenkins
- Heuristic evaluation of the application has been completed applying Nielsen's Heuristics.
- Report on acceptance testing has been completed.
- Codebase has been cleaned up to an acceptable level.
- Unit tests have been rewritten following code cleanup

### What is in progress:

- No tasks left in progress.

### Obstacles we faced:

- The team faced no obstacles during the sprint.
